<b>Undeveloped Land at Period End</b> (thousand net acres)	<b>33</b>	<b>33</b>	<b>–</b>

Throughout this report, the calculation of barrels of oil equivalent ("boe") is based on the conversion ratio that six thousand cubic feet of natural gas is equivalent to one barrel of oil. For a further discussion about this term, refer to the Management's Discussion and Analysis section in this report.

Funds flow from operating activities is an additional GAAP measure presented on the consolidated statement of cash flows, it represents cash flow from operating activities adjusted for asset retirement expenditures and changes in non-cash operating working capital. For a further discussion about this term, refer to the Management's Discussion and Analysis section in this report.

The debt amount is the full future face value of the \$3.5 million (USD) term debt plus an original issue discount of \$0.15 million (USD) in Canadian dollars.

Net debt is a non-GAAP measure that represents the debt face value of \$4.87 million (March 31, 2018 – nil) plus the convertible debenture of \$41.94 million (prior to the settlement on January 11, 2019) and any working capital excluding unrealized assets/liabilities.

**Natural Gas Production**  
(mmcf/d)

**Message to Shareholders <sup>(1)</sup>**

Zargon Oil & Gas Ltd. has released financial and operating results for the first quarter of 2019. Specific financial and operating highlights in the first quarter of 2019 include:

- On January 11, 2019, Zargon announced the completion of a transaction to settle its \$41.94 million principal amount of outstanding 8% Convertible Debentures due December 31, 2019 in exchange for common shares of Zargon. Immediately before the transaction, 30,932,912 common shares were issued and outstanding. Following the completion of the transaction, 459,811,236 common shares were issued and outstanding. Following closing, the Company has reduced its overall debt by \$41.94 million and its annual interest burden by \$3.36 million, resulting in a simplified capital structure with only \$3.50 million (USD) of term debt outstanding.
- Funds flow from operating activities of \$1.23 million compared to the negative \$2.74 million recorded in the prior quarter, and the negative \$0.30 million reported in first quarter of 2018. The increase from the prior quarter is primarily due to higher commodity prices due to the narrowing of the WTI-WCS differentials and lower interest expenses due to the settlement of the convertible debentures.
- First quarter 2019 production averaged 1,808 barrels of oil equivalent per day, essentially unchanged from the preceding quarter rate of 1,786 barrels of oil equivalent per day and a 26 percent decrease from the 2018 first quarter rate of 2,427 barrels of oil equivalent per day.
- First quarter 2019 field oil prices averaged \$56.54 per barrel, a 78 percent gain from the prior quarter price of \$31.74 per barrel and an eight percent gain from the 2018 first quarter price of \$52.48 per barrel.
- First quarters 2019 field operating netbacks defined as sales less royalties and operating/transportation costs were \$14.00 per barrel of oil equivalent, a significant improvement from the prior quarters operating netback of a negative \$3.84 per barrel of oil equivalent. The corresponding first quarters 2019 field operating cash flow was \$2.28 million, which compares with the prior quarters negative \$0.63 million.
- First quarter 2019 capital expenditures totaled \$0.75 million, a \$0.07 million increase from the \$0.68 million recorded in the prior quarter. The cash constrained reduced program was primarily allocated to well reactivations and pipeline construction projects. No wells were drilled in the quarter.
- First quarter 2019 abandonment and reclamation costs totaled \$0.22 million, a \$0.63 million decrease from the \$0.85 million recorded in the prior quarter.

The outlook for Zargon is improving in 2019 with the narrowing of the WTI-WCS differentials and the settlement of our \$41.94 million principal amount of convertible debentures. For further information regarding Zargon's properties, opportunities and outlook, please refer to our updated corporate presentation, which is available at [www.zargon.ca](http://www.zargon.ca).

**Strategic Alternatives Process Update <sup>(1)</sup>**

In 2015 Zargon formed a Special Board Committee (the "Committee") to examine alternatives available to maximize shareholder value. Macquarie Capital Markets Canada Ltd. ("Macquarie") is currently engaged as Zargon's exclusive financial advisor to evaluate strategic alternatives available to Zargon which may include a sale of the Company or a portion of the Company's assets, a restructuring of the Company's current capital structure, the addition of capital to further develop the potential of the assets, a merger, a farm-in or joint venture, or other such options as may be determined by the Board of Directors to be in the best interests of the Company and its stakeholders.

*(1) Please see comments on "Forward-Looking Statements" in the Management's Discussion and Analysis section in this report.*

## MANAGEMENT'S DISCUSSION AND ANALYSIS

Management's discussion and analysis ("MD&A") is a review of Zargon Oil & Gas Ltd.'s 2019 first quarter financial results and should be read in conjunction with the unaudited interim consolidated financial statements and related notes for the three months ended March 31, 2019 and the audited consolidated financial statements and related notes for the year ended December 31, 2018. The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), which are also generally accepted accounting principles ("GAAP") for publicly accountable enterprises in Canada. All amounts are in Canadian dollars unless otherwise noted. All references to "Zargon" or the "Company" refer to Zargon Oil & Gas Ltd.

In the MD&A, natural gas is converted to a barrel of oil equivalent ("Boe") using six thousand cubic feet of gas to one barrel of oil. In certain circumstances, natural gas liquid volumes have been converted to a thousand cubic feet equivalent ("Mcf") on the basis of one barrel of natural gas liquids to six thousand cubic feet of gas. Boes and Mcfes may be misleading, particularly if used in isolation. A conversion ratio of one barrel to six thousand cubic feet of natural gas is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. Given that the value ratio based on the current price of crude oil as compared to natural gas is significantly different from the energy equivalency of 6:1, utilizing a conversion ratio on a 6:1 basis may be misleading as an indication of value.

The following are descriptions of additional GAAP measures used in this MD&A:

- The MD&A contains the term "funds flow from operating activities" ("funds flow"), which should not be considered an alternative to, or more meaningful than, "cash flows from operating activities" as determined in accordance with IFRS as an indicator of the Company's financial performance. This term does not have any standardized meaning as prescribed by IFRS and, therefore, the Company's determination of funds flow from operating activities may not be comparable to that reported by other companies. The Company evaluates its performance based on net earnings and funds flow from operating activities. The Company considers funds flow from operating activities to be a key measure as it demonstrates the Company's ability to generate the cash necessary to repay debt and to fund future capital investment. It is also used by research analysts to value and compare oil and gas companies, and it is frequently included in published research when providing investment recommendations.

The following are descriptions of non-GAAP measures used in this MD&A:

- The Company uses the term "debt net of working capital" or "net debt". Debt net of working capital, as presented, does not have any standardized meaning prescribed by IFRS and may not be comparable with the calculation of similar measures for other entities. Debt net of working capital, as used by the Company, is calculated as the convertible debenture of \$41.94 million (prior to January 11, 2019) and the debt face value of \$4.87 million (December 31, 2018 – \$4.97 million) and any working capital excluding unrealized derivative assets/liabilities.
- Operating netbacks per boe equal total petroleum and natural gas sales per boe adjusted for realized derivative gains and/or losses per boe, royalties per boe, operating expenses per boe and transportation expenses per boe. Operating netbacks are a useful measure to compare the Company's operations with those of its peers.
- Funds flow netbacks per boe are calculated as operating netbacks less general and administrative expenses per boe, transaction costs per boe, interest and financing charges per boe, interest on the convertible debenture per boe, asset retirement expenditures per boe, cash portion of exploration and evaluation per boe, other expense per boe and current income taxes per boe. Funds flow netbacks are a useful measure to compare the Company's operations with those of its peers.

References to “production volumes” or “production” in this document refer to sales volumes.

*Forward-Looking Statements* – This document offers our assessment of Zargon’s future plans and operations as at May 14, 2019, and contains forward-looking statements including:

- our expectations for our use of funds from our US term debt and the terms of the loan referred to under the headings “Liquidity and Capital Resources and Going Concern”;
- our expected sources of funds for capital expenditures referred to under the heading “Liquidity and Capital Resources and Going Concern”;
- our expectations for the Company’s ability to continue as a going concern referred to under the heading “Liquidity and Capital Resources and Going Concern”; and
- our strategic alternatives process referred to under the heading “Outlook”.

Such statements are generally identified by the use of words such as “anticipate”, “continue”, “estimate”, “expect”, “forecast”, “may”, “will”, “project”, “should”, “plan”, “intend”, “believe” and similar expressions (including the negatives thereof). By their nature, forward-looking statements are subject to numerous risks and uncertainties, some of which are beyond our control, including such as those relating to results of operations and financial condition, general economic conditions, industry conditions, changes in regulatory and taxation regimes, volatility of commodity prices, escalation of operating and capital costs, currency fluctuations, the availability of services, imprecision of reserve estimates, geological, technical, drilling and processing problems, environmental risks, weather, the lack of availability of qualified personnel or management, stock market volatility, the ability to access sufficient capital from internal and external sources and competition from other industry participants for, among other things, capital, services, acquisitions of reserves, undeveloped lands and skilled personnel. Risks are described in more detail in our Annual Information Form, which is available on our website and at [www.sedar.com](http://www.sedar.com). Forward-looking statements are provided to allow investors to have a greater understanding of our business.

You are cautioned that the assumptions, including among other things, future oil and natural gas prices; future capital expenditure levels (including ASP); future production levels; future exchange rates; the cost of developing and expanding our assets; our ability to obtain equipment in a timely manner to carry out development activities; our ability to market our oil and natural gas successfully to current and new customers; the impact of increasing competition, our ability to obtain financing on acceptable terms; and our ability to add production and reserves through our development and acquisition activities used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements. Our actual results, performance, or achievements could differ materially from those expressed in, or implied by, these forward-looking statements. We can give no assurance that any of the events anticipated will transpire or occur, or if any of them do, what benefits we will derive from them. The forward-looking information contained in this document is expressly qualified by this cautionary statement. Our policy for updating forward-looking statements is that Zargon disclaims, except as required by law, any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

This MD&A has been prepared as of May 14, 2019.

## FINANCIAL & OPERATING RESULTS

### Petroleum and Natural Gas Sales

(\$ millions)	Three months ended March 31,		
	2019	2018	Percent Change
Petroleum sales	8.02	9.20	(13)
Natural gas sales	0.29	0.51	(43)
Petroleum and natural gas sales	8.31	9.71	(14)

First quarter 2019 gross petroleum and natural gas sales of \$8.31 million increased 74 percent compared to \$4.77 in the preceding quarter but decreased 14 percent compared to \$9.71 million in the first quarter of 2018. First quarter 2019 realized oil and liquids field prices averaged \$56.54 per barrel and were eight percent higher than the \$52.48 per barrel recorded in the 2018 first quarter. The WTI-WCS differential narrowed during the first quarter of 2019 to \$16.33 per barrel compared to \$52.19 per barrel in the fourth quarter of 2018. Natural gas field prices received averaged \$2.28 per thousand cubic feet in the first quarter of 2019, a 15 percent increase from the 2018 first quarter prices.

### Pricing

Average for the period	Three Months Ended March 31,		
	2019	2018	Percent Change
Natural Gas:			
NYMEX average daily spot price (\$US/mmbtu)	2.92	3.01	(3)
AECO average daily spot price (\$Cdn/mmbtu)	1.75	2.08	(16)
Zargon realized field price (\$Cdn/mcf)	2.28	1.98	15
Zargon realized natural gas field price differential (\$Cdn/mcf)	(0.53)	0.10	(630)
Crude Oil:			
WTI (\$US/bbl)	54.90	62.87	(13)
Edmonton par price (\$Cdn/bbl)	66.40	72.18	(8)
Western Canadian Select ("WCS") price (\$Cdn/bbl)	56.64	48.76	16
Zargon realized field price before the impact of financial risk management contracts (\$Cdn/bbl)	56.54	52.48	8
Zargon realized field price after the impact of financial risk management contracts (\$Cdn/bbl)	56.54	47.63	19
Zargon realized oil field price differential to WCS <sup>(1)</sup>	(0.10)	3.72	(103)
WTI (\$Cdn/bbl) to WCS (\$Cdn/bbl) differential	16.33	30.76	(47)

(1) Calculated as Zargon's realized field price before the impact of financial risk management contracts (\$Cdn/bbl) as compared to the Western Canadian Select price (\$Cdn/bbl).

### Volumes

Oil and liquids production volumes during the 2019 first quarter were 1,576 barrels per day, essentially unchanged from the preceding quarter rate of 1,575 barrels per day. Production volumes were challenged in the quarter by extremely cold weather in February and related electrical power bumps. Natural gas production volumes increased nine percent in the 2019 first quarter to 1.39 million cubic feet per day compared to 1.27 million cubic feet per day in the prior quarter (Q1 2018 – 2.87 million cubic feet per day). Natural gas production increased due to the completion of a battery reconnect project, offset by naturally occurring production declines.

Petroleum and Natural Gas Revenue  
(\$ millions)

Natural Gas Prices  
(\$/mcf)

Oil and Liquids Prices  
(\$/bbl)

## Production by Core Area

Three Months Ended March 31,	2019			2018		
	Oil and Liquids (bbl/d)	Natural Gas (mmcf/d)	Equivalents (boe/d)	Oil and Liquids (bbl/d)	Natural Gas (mmcf/d)	Equivalents (boe/d)
Alberta Plains North	370	0.59	468	520	1.30	736
Alberta Plains South	822	0.80	956	1,008	1.57	1,270
Williston Basin	384	–	384	421	–	421
	<b>1,576</b>	<b>1.39</b>	<b>1,808</b>	1,949	2.87	2,427

## Risk Management Contracts

Zargon's commodity price risk management policy, which is approved by the Board of Directors, allows for the sale of up to a certain percentage of its estimated before royalty production volumes for each commodity up to a 30 month period. Zargon may also enter into interest rate swaps.

For accounting purposes, an unrealized gain or loss from forward sale commodity contracts is recorded based on the fair value ("mark-to-market") of the contracts at the period end. Realized and unrealized gains/losses on risk management contracts are included in "gain/loss on derivatives" in the consolidated statement of earnings/(loss) and their fair value is reflected in "derivative assets" or "derivative liabilities" on the consolidated balance sheets.

The net realized gain/loss for the 2019 first quarter was nil, compared to a \$0.85 million net realized loss in the first quarter of 2018. There are currently no derivative contracts outstanding.

The unrealized gain/loss on derivatives in the first quarter of 2019 was nil, compared to \$0.36 million loss in the first quarter of 2018 which was related to oil contract losses. These non-cash unrealized derivative gains or losses are generated by the change over the reporting period in the mark-to-market valuation of Zargon's risk management contracts. Commodity price volatility has resulted in significant fluctuations in the mark-to-market amount of unrealized derivative assets and liabilities. Zargon's commodity risk management positions are described in Notes 12 and 13 to the unaudited interim consolidated financial statements.

## Royalties

(\$ millions)	Three months ended March 31,		
	2019	2018	Percent Change
Royalties	0.91	1.29	(29)
Percentage of revenue	11.0%	13.2%	

First quarter 2019 royalties of \$0.91 million increased 27 percent compared to the prior quarter but decreased 29 percent from the 2018 first quarter, the increase was primarily due to the increase in crude oil prices. The variations in royalty rates generally track changes in production and volumes. First quarter of 2019 royalties were 11.0 percent of gross sales compared to 13.2 percent in the first quarter of 2018.

## Operating Expenses and Transportation Expenses

(\$ millions)	Three months ended March 31,		
	2019	2018	Percent Change
Operating expenses	5.01	5.89	(15)
Transportation expenses	0.10	0.12	(17)
Total expenses	5.11	6.01	(15)
Total expenses (\$/boe)	31.45	27.52	14

First quarter 2019 operating expenses and transportation expenses of \$5.11 million on a total dollar basis were up compared to \$4.68 million recorded in the prior quarter but lower compared to \$6.01 million recorded in the first quarter of 2018. First quarter 2019 operating costs were higher compared to the prior quarter due to higher electricity costs and cold weather related operational costs.

## Operating Netbacks

Three Months Ended March 31,	2019		2018	
	Oil and Liquids (\$/bbl)	Natural Gas (\$/mcf)	Oil and Liquids (\$/bbl)	Natural Gas (\$/mcf)
Sales	56.54	2.28	52.48	1.98
Royalties	(6.48)	0.07	(7.30)	(0.02)
Realized loss on derivatives	–	–	(4.85)	–
Operating expenses	(28.88)	(7.32)	(27.57)	(4.08)
Transportation expenses	(0.73)	–	(0.68)	–
Operating netbacks	20.45	(4.97)	12.08	(2.12)

## General & Administrative (“G&A”) Expenses

(\$ millions)	Three months ended March 31,		
	2019	2018	Percent Change
G&A expenses	0.87	0.97	(10)
G&A expenses (\$/boe)	5.32	4.43	20

G&A expenses of \$0.87 million and \$5.32 per barrel of oil equivalent in the first quarter of 2019 reflected Zargon’s ongoing G&A cost containment initiatives and were lower than the \$0.97 million and \$0.88 million reported in the first quarter of 2018 and the fourth quarter of 2018, respectively.

## Transaction Costs

Transaction costs for the 2019 first quarter were \$0.05 million compared to \$0.07 million in the prior quarter and \$0.07 million in the first quarter of 2018 and related to Zargon’s ongoing strategic alternatives review.

## Interest and Financing Charges on Bank Debt

On November 2, 2018, Zargon entered into a financing agreement for \$3.50 million (USD) term debt. The loan is secured by all U.S. assets of Zargon. The loan bears interest at 11% and principal repayments commence on July 1, 2019 at \$50,000 (USD) per month and on October 1, 2019 principal repayments will be \$75,000 (USD) per month until maturity at April 1, 2020 when the balance of the principal plus an original issue discount of \$145,833 (USD) is payable.

Interest and financing charges were \$0.14 million or \$0.87 per barrel of oil equivalent in the 2019 first quarter compares to the \$0.34 million of the interest and financing income in the prior quarter and nil in the first quarter of 2018.

### Interest on Convertible Debentures

On January 11, 2019, Zargon announced the completion of a transaction to settle its \$41.94 million Convertible Debentures. Following the closing, the Company has reduced its overall debt by \$41.94 million and its associated annual interest burden.

The interest charges for the 2019 first quarter was \$0.10 million compared to \$0.84 million in the first quarter of 2018. For more details, please refer to Note 8 of the interim consolidated financial statements.

### Current Tax

The current tax expense for the first quarter of 2019 and the prior quarter were nil (Q1 2018 – nil). Total corporate tax pools as at March 31, 2019 are approximately \$204 million, unchanged from the \$204 million of tax pools available to Zargon at December 31, 2018.

### Estimated Tax Pools

(\$ millions)	March 31, 2019
Canadian oil and natural gas property expenses	–
Canadian development expenses	9
Canadian exploration expenses	4
Capital cost allowance	18
Non-capital losses	170
US tax pools	1
Other	2
<b>Estimated tax pools</b>	<b>204</b>

Funds Flow  
Netbacks  
(\$/boe)

### Corporate Netbacks

(\$/boe)	Three Months Ended March 31,	
	2019	2018
Petroleum and natural gas sales	<b>51.04</b>	44.47
Royalties	<b>(5.59)</b>	(5.88)
Realized loss on derivatives	–	(3.89)
Operating expenses	<b>(30.81)</b>	(26.97)
Transportation expenses	<b>(0.64)</b>	(0.55)
<b>Operating netbacks</b>	<b>14.00</b>	7.18
General and administrative expenses	<b>(5.32)</b>	(4.43)

Interest and financing charges	<b>(0.87)</b>	0.01
Interest on convertible debentures	–	(3.84)
<b>Funds flow netbacks</b>	<b>7.53</b>	(1.38)

Funds Flow  
from Operating  
Activities  
(\$ millions)

### **Depletion and Depreciation Expense**

Depletion and depreciation expense for the first quarter of 2019 decreased 30 percent at \$2.24 million compared to \$3.21 million in the first quarter of 2018 due to a \$21.16 million impairment loss on property, plant and equipment recognized in the prior quarter. On a per barrel of oil equivalent basis, the depletion and depreciation rates were \$13.74 and \$14.68 for the first quarter of 2019 and 2018, respectively. The 2018 calendar year depletion and depreciation rate was \$15.11 per barrel of oil equivalent.

### **Accretion of Asset Retirement Obligations, Debt and Convertible Debentures**

The accretion expense of asset retirement obligations for the first three months of 2019 was \$0.36 million and was essentially unchanged compared to the first quarter of 2018. Year-over-year adjustments are due to actual abandonment and reclamation costs and changes in the estimated future liability for asset retirement obligations resulting from changes in cost assumptions and adjustments in Zargon's well count due to drilling programs and property acquisitions or dispositions.

Zargon's \$3.50 million (USD) term debt is accreted over its term, up to the total principal balance plus an original issue discount of \$0.15 million (USD), for a total face value of \$3.65 million (USD) or \$4.87 million Canadian dollars. Accretion on the term debt for the first three months of 2019 was \$0.04 million, which compares to nil for the first quarter of 2018.

On January 11, 2019, Zargon announced the completion of a transaction to settle its \$41.94 million Convertible Debentures, therefore the accretion on the convertible debenture for the 2019 first quarter was \$0.52 million compared to \$0.11 million in the 2018 first quarter due to the change in settlement date. For more information on Zargon's convertible debentures and this transaction, please refer to Note 8 of the interim consolidated financial statements.

### **Gain on convertible debentures**

As a result of the convertible debenture settlement, the Company recognized a gain of \$27.03 million. For more information on this transaction, please refer to Note 8 of the interim consolidated financial statements.

### **Shared-based Compensation**

Expensing of share-based compensation in the first quarter of 2019 totalled \$0.01 million, which is slightly lower than the \$0.04 million incurred in the first quarter of 2018.

### **Unrealized Foreign Exchange**

The Company had an unrealized foreign exchange loss of \$0.01 million during the first quarter of 2019 compared to a gain of \$0.02 million in the first quarter of 2018. Gains and losses result from transactions in US dollars when they are translated into Canadian dollars. The volatility in the US/Cdn dollar creates non-cash translation gains/losses.

### **Deferred Tax**

The deferred tax recovery for the first quarter of 2019 was \$0.10 million compared to nil in the first quarter of 2018.

### **Funds Flow from Operating Activities**

Funds flow from operating activities in the 2019 first quarter was \$1.23 million and compared to a negative \$2.74 million and a negative \$0.30 million reported in the preceding quarter and the first quarter of 2018, respectively. The increase in funds flow compared to the prior quarter and the 2018 first quarter was primarily a result of higher realized field prices and lower interest expenses.

Details of the change in fund from operating activities during 2019 and 2018 are as follows:

(\$ millions)	2019		2018		
	Q1	Q4	Q3	Q2	Q1
<b>Funds flow from operating activities, prior quarter</b>	<b>(2.74)</b>	1.93	0.58	(0.30)	1.59
<b>Variances from prior quarter:</b>					
<b>Revenue and royalties:</b>

<b>Funds flow from operating activities for the quarter</b>	<b>1.23</b>	(2.74)	1.93	0.58	(0.30)

#### **Net Earnings/(Loss)**

Net earnings of \$25.08 million for the 2019 first quarter was 679 percent higher than the \$4.33 million net loss in the first quarter of 2018, primarily due to a \$27.03 million gain on the settlement of convertible debentures and lower interest, royalties and operating expenses. The net earnings/(loss) track the funds flow from operating activities for the respective periods and non-cash charges, which include depletion and depreciation, accretion, gain on convertible debentures and deferred taxes. On a per diluted share basis, the 2019 first quarter net earnings was \$0.06, compared to a net loss of \$0.14 from the 2018 first quarter.

## Capital Expenditures

(\$ millions)	Three Months Ended March 31,	
	2019	2018
Undeveloped land	0.21	0.33
Geological and geophysical (seismic)	–	0.05
Drilling and completion of wells	0.15	0.30

ASP chemical costs	0.22	0.65
Exploration and development	0.75	1.89
Property acquisitions	–	–
Property dispositions	–	(0.41)
Net property acquisitions	–	(0.41)
Total net capital expenditures excluding administrative assets	0.75	1.48
Administrative assets	–	0.02
Total net capital expenditures	0.75	1.50

## LIQUIDITY AND CAPITAL RESOURCES AND GOING CONCERN

Total net capital expenditures (including net property acquisitions) totalled \$0.75 million in the first quarter of 2019 and were 50 percent lower than the same period in 2018, which reflects the Company's focus on reduced capital spending, specifically deferred workover programs. Field expenditures of \$0.75 million for the first quarter of 2019 were 60 percent lower than the 2018 first quarter. The first quarter 2019 field capital expenditures (excluding net property acquisitions) were allocated to Alberta Plains North – a negative \$0.02 million, Alberta Plains South - \$0.75 million and Williston Basin - \$0.02 million and included the drilling of nil net wells, unchanged from the first quarter of 2018.

Included in the Alberta Plains South capital expenditures is the \$0.41 million incurred on the Little Bow ASP project. Of the total ASP amount, \$0.19 million was spent on project and exploitation costs while \$0.22 million was spent on chemical costs for the facility.

On November 2, 2018, Zargon entered into a financing agreement for \$3.50 (USD) term debt. The loan is secured by all U.S. assets of Zargon. The loan bears interest at 11% and principal repayments commence on July 1, 2019 at \$50,000 (USD) per month and on October 1, 2019 principal repayments will be \$75,000 (USD) per month until maturity at April 1, 2020 when the balance of the principal plus an original issue discount of \$145,833 (USD) is payable.

At March 31, 2019, the Company's combined debt net of working capital (excluding unrealized derivative assets/liabilities) was \$2.26 million, which compares to \$45.17 million of net debt at the end of December 31, 2018 (or the pro forma debt net of working capital of \$2.39 million after removing the face value of the convertible debenture of \$41.94 million and accrued interest of \$0.84 million) The \$2.26 million debt net of working capital consists of the face value of the principal amount of the term debt, which includes the original issue discount, of \$4.87 million (CDN), which is partially offset by net cash balances.

On January 11, 2019, Zargon announced the completion of a transaction to settle its \$41.94 million principal amount of outstanding 8% Convertible Debentures due December 31, 2019 in exchange for common shares of Zargon. Following closing, the Company has reduced its overall debt by \$41.94 million and its annual interest burden by \$3.36 million, resulting in a simplified capital structure with only \$3.5 million (USD) of term debt outstanding.

The volatility of oil and natural gas prices, uncertainty or modifications regarding royalties and Canadian income tax rules and global economic/political concerns have, on occasion, restricted the oil and natural gas industry's ability to attract new capital from debt and equity markets.

Zargon's operational results and financial condition, and, therefore, the funds available to be allocated to capital expenditures, are dependent on the prices received for oil and natural gas production.

These financial statements have been prepared in accordance with generally accepted accounting principles applicable to a going concern, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As of March 31, 2019, the Company has working capital of \$2.61 million (defined as current assets less accounts payable), negative cash flows from operating activities of \$0.93 million and generated a net earnings for the three months ended March 31, 2019 of \$25.08 million (included a \$27.03 million gain on convertible debentures). During the first quarter, the WCS differential to WTI tightened as crude oil production was curtailed in western Canada in an effort to reduce inventory levels, which resulted in improvements on the Company's projected cash flows compared to the previous quarter. Although the narrowing of the WTI-WCS differential has had a positive impact on our forecasts, there is still ongoing material uncertainty related to future events that may cast substantial doubt on the Company's ability to continue as a going concern and therefore, it may be unable to realize its assets and discharge its liabilities in the normal course of business. The continuation of the Company as a going concern is dependent upon the occurrence of all or some of these future events: actual prices exceeding the current estimates in the coming six months, accessing additional capital, or other unforeseen events. In an effort to mitigate these challenges, the Company obtained \$3.50 million (USD) of term debt in November 2018, and furthermore in January 2019 the Company settled its outstanding \$41.94 million convertible debentures, thereby eliminating \$4.20 million of debenture interest payments that were due and payable in 2019. These financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate. If the going concern basis were not appropriate for these financial statements, then adjustments would be necessary in the carrying value of the assets and liabilities, the reported revenues and expenses, and the balance sheet classifications used. These adjustments could be material.

For the quarter ended March 31, 2019, net capital expenditures totalled \$0.75 million, which was \$1.68 million higher than the cash flows from operating activities (after changes in non-cash working capital) of a negative \$0.93 million. For the quarter ended March 31, 2018, net capital expenditures totalled \$1.50 million, which was \$0.70 million higher than the cash flows from operating activities (after changes in non-cash working capital) of \$0.80 million. Zargon relies on access to debt and capital markets to the extent that net capital expenditures exceed cash flows from operating activities (after changes in non-cash working capital). Over the long term, Zargon expects to fund capital expenditures with its cash flows from operating activities; however, it may fund growth through additional debt and equity issuances. In the crude oil and natural gas industry, because of the nature of reserve reporting, the natural reservoir declines and the risks involved in capital investment, it is not possible to distinguish between capital spent on maintaining productive capacity and capital spent on growth opportunities. Therefore, maintenance capital is not disclosed separately from development capital spending.

At May 14, 2019, Zargon Oil & Gas Ltd. had 459.81 million common shares outstanding. Pursuant to the stock option plan and the share award plan, there are currently an additional 0.24 million common share awards issued and outstanding and 1.16 million stock options issued and outstanding.

## Capital Sources and Uses

(\$ millions)	Three Months Ended March 31,	
	2019	2018
Funds flow from/(used in) operating activities	1.23	(0.30)
Change in long term debt	(0.06)	–
Change in cash	1.78	1.23
Issuance of common shares	(0.09)	–
Asset retirement costs	(0.22)	(0.61)
Changes in working capital and other	(1.89)	1.18
Total capital sources	0.75	1.50

## CONTRACTUAL OBLIGATIONS AND CONTINGENCIES

Zargon has certain contractual obligations relating to the lease of head office space and insurance financing that extend for longer than one year as set out in the table below:

(\$ millions)	Total	2019	2020 to 2021	2022 to 2023	Thereafter
Head office lease	0.20	0.20	–	–	–
Insurance	0.16	0.16	–	–	–
Total	0.36	0.36	–	–	–

## LIABILITY MANAGEMENT RATING

On June 20, 2016, the Alberta Energy Regulator ("AER") issued Bulletin 2016-16 which put in place certain interim measures for transfers of AER regulated assets including a requirement that all transferees demonstrate that they have a Liability Management Rating ("LMR") of 2.0 or higher immediately following the transfer. At May 4, 2019, Zargon's LMR was 1.06. Although there is a significant level of uncertainty around the application of Bulletin 2016-16, it could restrict Zargon from buying or selling oil and gas assets, which could negatively impact its business.

## CHANGES IN ACCOUNTING POLICIES

The Company's changes in accounting policies are discussed in Note 3 to the Financial Statements.

## FUTURE CHANGES IN ACCOUNTING POLICIES

The Company's future changes in accounting policies are discussed in Note 3 to the Financial Statements.

## MANAGEMENT AND FINANCIAL REPORTING SYSTEMS

Zargon is required to comply with National Instrument 52-109 "Certification of Disclosure in Issuers' Annual and Interim Filings", otherwise referred to as Canadian SOX ("C-Sox"). The 2019 certificate requires that the Company disclose in the interim MD&A any changes in the Company's internal controls over financial reporting that occurred during the period that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. The Company confirms that no such changes were made to the internal controls over financial reporting during the first quarter of 2019.

Because of their inherent limitations, internal controls over financial reporting may not prevent or detect misstatements, errors or fraud. Control systems, no matter how well conceived or operated, can provide only reasonable, not absolute assurance that the objectives of the control systems are met. Zargon uses the 2013 Committee of Sponsoring Organizations of the Treadway Commission (“COSO”) Framework.

## OUTLOOK

The outlook for Zargon’s projected cash flows has improved with the settlement of our \$41.94 million principal amount of convertible debentures and the narrowing of the 2019 WTI-WCS differentials.

In 2015 Zargon formed a Special Board Committee (the “Committee”) to examine alternatives available to maximize shareholder value. Macquarie Capital Markets Canada Ltd. (“Macquarie”) is currently engaged as Zargon’s exclusive financial advisor to evaluate strategic alternatives available to Zargon which may include a sale of the Company or a portion of the Company’s assets, a restructuring of the Company’s current capital structure, the addition of capital to further develop the potential of the assets, a merger, a farm-in or joint venture, or other such options as may be determined by the Board of Directors to be in the best interests of the Company and its stakeholders.

## SUMMARY OF QUARTERLY RESULTS

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

*For the three months ended March 31, 2019, with comparative figures for 2018 (unaudited).*

## 1. REPORTING ENTITY

Zargon Oil & Gas Ltd. ("the Company" or "Zargon") is a publicly traded corporation, incorporated in Canada, with its head office located at Suite 1100, 112 - 4<sup>th</sup> Avenue SW, Calgary, Alberta. The consolidated financial statements of the Company as at and for the period ended March 31, 2019 and its 2018 comparative periods are comprised of the Company and its wholly owned subsidiaries. The Company is engaged in the exploration, development and production of oil and natural gas in Canada and the United States ("US") and conducts many of its activities jointly with others; these financial statements reflect only the Company's proportionate interest in such activities.

## 2. BASIS OF PRESENTATION AND GOING CONCERN

### (a) Statement of compliance:

The unaudited interim consolidated financial statements for the three month period ended March 31, 2019 have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including International Accounting Standards ("IAS") 34, Interim Financial Reporting. The same accounting policies and methods of computation were followed in the preparation of these unaudited interim consolidated financial statements as were followed in the preparation of the audited annual consolidated financial statements for the fiscal year ended December 31, 2018 with the exception of new and amended accounting standards that have been evaluated and disclosed in Note 3. The disclosures provided below are incremental to those included with the audited annual consolidated financial statements. These unaudited interim consolidated financial statements for the three month period ended March 31, 2019 should be read in conjunction with the annual consolidated financial statements for the year ended December 31, 2018. These consolidated financial statements were approved and authorized for issue by the Board of Directors on May 14, 2019.

### (b) Basis of measurement:

The interim consolidated financial statements have been prepared on the historical cost basis except for the derivative financial instruments and the investment in marketable securities which are measured at fair value.

### (c) Functional and presentation currency:

Items included in the financial statements of each consolidated entity are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The interim consolidated financial statements are presented in Canadian dollars, which is Zargon's functional currency.

The financial statements of subsidiaries that have a functional currency different from that of Zargon ("foreign operations") are translated into Canadian dollars as follows: assets and liabilities - at the closing rate at the date of the balance sheet, and income and expenses - at the average rate of the period (as this is considered a reasonable approximation to actual rates). All resulting changes are recognized in other comprehensive income as currency translation adjustments.

If Zargon disposes of its entire interest in a foreign operation, or loses control, joint control, or significant influence over a foreign operation, the foreign currency gains or losses accumulated in other comprehensive income related to the foreign operation are recognized in earnings. If Zargon disposes of part of an interest in a foreign operation which remains a subsidiary, a proportionate amount of foreign currency gains or losses accumulated in other comprehensive income related to the subsidiary are reallocated between controlling and non-controlling interests.

### (d) Use of estimates and judgements:

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

(e) Going Concern:

These financial statements have been prepared in accordance with generally accepted accounting principles applicable to a going concern, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As of March 31, 2019, the Company has working capital of \$2.61 million (defined as current assets less accounts payable), negative cash flows from operating activities of \$0.93 million and generated a net earnings for the three months ended March 31, 2019 of \$25.08 million (included a \$27.03 million gain on convertible debentures). During the first quarter, the WCS differential to WTI tightened as crude oil production was curtailed in western Canada in an effort to reduce inventory levels, which resulted in improvements on the Company's projected cash flows compared to the previous quarter. Although the narrowing of the WTI-WCS differential has had a positive impact on our forecasts, there is still ongoing material uncertainty related to future events that may cast substantial doubt on the Company's ability to continue as a going concern and therefore, it may be unable to realize its assets and discharge its liabilities in the normal course of business. The continuation of the Company as a going concern is dependent upon the occurrence of all or some of these future events: actual prices exceeding the current estimates in the coming six months, accessing additional capital, or other unforeseen events. In an effort to mitigate these challenges, the Company obtained \$3.50 million (USD) of term debt in November 2018, and furthermore in January 2019 the Company settled its outstanding \$41.94 million convertible debentures, thereby eliminating \$4.20 million of debenture interest payments that were due and payable in 2019. These financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate. If the going concern basis were not appropriate for these financial statements, then adjustments would be necessary in the carrying value of the assets and liabilities, the reported revenues and expenses, and the balance sheet classifications used. These adjustments could be material.

### 3. ACCOUNTING POLICIES

New and amended standards adopted by the Company:

- IFRS 16 "Leases", was issued by the IASB in January 2016, which replaces IAS 17 "Leases". Under the current guidance, lessees are required to determine if the lease is a finance or operating lease, based on specified criteria. Finance leases are recognized on the consolidated balance sheet while operating leases are recognized in the consolidated statement of earnings when the expense is incurred. Under IFRS 16, lessees must recognize a lease liability and a right-of-use asset for virtually all lease contracts. The recognition of the present value of minimum lease payments for certain contracts currently classified as operating leases will result in increases to assets, liabilities, depletion and depreciation expense, and finance expense, and a decrease to operating expense upon implementation. An optional exemption to not recognize certain short-term leases of low value can be applied by lessees. For lessors, the accounting remains essentially unchanged.

On January 1, 2019, Zargon adopted IFRS 16 "Leases" using the modified retrospective approach. The modified retrospective approach does not require restatement of prior period financial information as it recognizes the cumulative effect as an ongoing adjustment to opening retained earnings and applies the standard prospectively. Accordingly, comparative information in the Company's financial statements are not restated.

At adoption, lease liabilities were measured at the present value of the remaining lease payments discounted using the Company's incremental borrowing rate. Right-of-use assets were measured at an amount equal to the lease liability and are included with property, plant and equipment. The Company applied the exemption to not recognize right-of-use assets and liabilities for leases with a lease term of less than 12 months. The adoption of IFRS 16 had no material impact on the Company's consolidated financial statements.

**4. PROPERTY, PLANT AND EQUIPMENT**

(\$ thousands)

Cost, December 31, 2018	<b>280,065</b>
Accumulated depletion and depreciation	<b>(179,416)</b>
Net carrying amount, December 31, 2018	<b>100,649</b>
Additions	<b>746</b>
Change in asset retirement obligation	<b>(232)</b>
Exchange differences	<b>(330)</b>
Depletion and depreciation	<b>(2,236)</b>
Net carrying amount, March 31, 2019	<b>98,597</b>
Cost, March 31, 2018	<b>279,778</b>
Accumulated depletion and depreciation	<b>(181,181)</b>
Net carrying amount, March 31, 2019	<b>98,597</b>

**5. ASSET RETIREMENT OBLIGATIONS**

(\$ thousands)

Balance at December 31, 2018	<b>63,412</b>
Foreign exchange and other	<b>(113)</b>
Asset retirement expenditures	<b>(222)</b>
Revisions to estimated asset retirement obligations	<b>(232)</b>
Accretion	<b>355</b>
Balance at March 31, 2019	<b>63,200</b>

The asset retirement obligations were calculated using a discount factor of 2.25 percent (December 31, 2018 – 2.25 percent) being the risk-free rate related to the liability and based on the Government of Canada long term bond rate. These obligations are expected to be incurred over the next 55 years. An inflation rate of two percent per annum (December 31, 2018 – two percent) used in the calculation of the present value of the asset retirement obligation remains unchanged.

**6. DEBT**

(\$ thousands)

	<b>March 31, 2019</b>	December 31, 2018
Debt (\$Cdn)	<b>4,742</b>	4,802
Lease liability (Note 7)	<b>111</b>	117
Total debt	<b>4,853</b>	4,919
Current (\$Cdn)	<b>802</b>	512
Non-current	<b>4,051</b>	4,407

On November 2, 2018 the Company entered into a financing agreement for \$3.50 million (USD) term debt. The terms of the loan are:

- The loan is secured by the Zargon's North Dakota assets.
- The loan bears interest at 11%.
- Principal repayments commence July 1, 2019 at \$0.05 million (USD) per month until September 1, 2019 and beginning on October 1, 2019 principal repayments will be \$0.08 million (USD) per month until maturity at April 1, 2020 when the balance of the principal plus an original issue discount of \$0.15 million (USD) is payable.
- The loan may be prepaid at any time, but is subject to make whole prepayment interest penalties calculated on the lesser of the remaining term of the loan or 12 months, which includes the four percent original issue discount.

- Additional payments of 8% of incremental revenue earned (after payment of royalties) in excess of a \$63.50 (USD) per barrel field price threshold, will also be made to the lender.
- If Zargon's North Dakota monthly production is less than 300 barrels of oil per day but exceeds 240 barrels of oil per day or if the Zargon's North Dakota properties EBITDA in a trailing 12 month period is less than \$1.75 million (USD) but exceeds \$1.25 million (USD), the Company is required to make an additional monthly principal repayment of \$0.08 million (USD).
- If Zargon's North Dakota's monthly production is less than 240 barrels of oil per day or if Zargon's North Dakota properties EBITDA in a trailing 12 month period is less than \$1.25 million (USD), the lender may demand immediate payment of the loan, accrued interest, and any applicable make whole payment.

A four percent original issue discount on the \$3.50 million (USD) term debt is payable upon maturity. The principal balance will accrete up to the face amount which includes the four percent original issue discount of \$0.15 million (USD). A reconciliation of the principal and accretion is provided below:

(\$ thousands)	March 31, 2019	December 31, 2018
Principal, beginning of year (\$Cdn)	4,802	–
Debt (\$Cdn)	–	4,777
Foreign exchange (\$Cdn)	(99)	–
Accretion of debt (\$Cdn)	39	25
Principal, end of period (\$Cdn)	4,742	4,802

## 7. LEASES

The Company has incurred lease payments related to vehicles. Leases are entered into and exited in coordination with specific business requirements which includes the assessment of the appropriate durations for the related leased assets.

A reconciliation of Zargon's capital lease obligations is provided below:

(\$ thousands)	March 31, 2019	December 31, 2018
Right-of-use assets, beginning of period <sup>(1)</sup>	117	121
Depreciation	6	4
Right-of-use assets, end of period <sup>(1)</sup>	111	117

(1) Included in property, plant and equipment.

## 8. CONVERTIBLE DEBENTURES

On November 21, 2018, Zargon announced the proposed transaction to settle its convertible debentures.

On January 10, 2019, Zargon announced that 82.64% of debentureholders voting at the extraordinary meeting of the debentureholders voted in favour of an extraordinary resolution pursuant to which all of the debentures will be settled and all claims of the debentureholders will be extinguished.

On January 11, 2019, Zargon announced that it had completed a transaction to settle its \$41.94 million principal amount of outstanding 8% convertible unsecured debentures due December 31, 2019 in exchange for Zargon common shares. Pursuant to the transaction, all of the Debentures were settled and all claims of the debentureholders were extinguished in exchange for an aggregate of 428.88 million common shares, including payment, in the form of common shares, of the accrued and unpaid interest owing on the Debentures from and including September 30, 2018 to but not including January 11, 2019, being the effective date of the completion of the transaction, in each case on the basis of a price of \$0.10 per common share. The deemed price of the 428.88 million common shares thus issued was \$0.04 per share, that being the applicable volume-weighted average trading price. This resulted in a gain of \$27.03 million. The \$41.94 million principal amount of outstanding 8% convertible unsecured debentures and the related equity component of convertible debentures was transferred to share capital (based on 428.88 million common shares at a price of \$0.04 per common share) and contributed surplus (based on a pro-rata calculation between the debt portion of the debenture and the equity portion of the debenture). A reconciliation of the accounting treatment of the convertible debenture settlement is provided in the table below:

(\$ thousands)	March 31, 2019	December 31, 2018
Debt component, beginning of year	41,421	41,461
Common shares issued <sup>(1)</sup> (Note 10)	(17,155)	–
Contributed surplus	(2,266)	–
Gain on convertible debenture	(27,027)	–
Accretion of convertible debentures	520	473
Accrued interest	937	–
Equity component	3,570	–
IFRS 9 adoption	–	(513)
Debt component, end of period	–	41,421
Equity component, beginning of year	3,570	3,570
Settlement	(3,570)	–
Equity component, end of period	–	3,570

(1) Immediately before the transaction, 30.93 million common shares were issued and outstanding. Following the completion of the transaction, 459.81 million common shares are issued and outstanding.

## 9. REVENUE

The company derives its revenue from contacts with customers primarily through the transfer of commodities representing the following major product types:

(\$ thousands)	Three Months Ended March 31,	
	2019	2018
Petroleum sales	8,020	9,203
Natural gas sales	285	510
Petroleum and natural gas sales	8,305	9,713

At March 31, 2019, receivables from contracts with customers, which are included in trade accounts receivable, were \$2.85 million (at March 31, 2018 – \$2.95 million).

The Company's custom fee revenues are included as an offset to operating expenses, and were \$0.11 million at March 31, 2019 (\$0.26 million as at March 31, 2018).

## 10. SHARE CAPITAL

The Company is authorized to issue an unlimited number of voting common shares and 10 million preferred shares.

Common Shares	Three Months Ended March 31, 2019	
(thousands)	Number of Shares	Amount (\$)
Balance, as at December 31, 2018	30,902	262,735
Share awards exercised	31	–
Share issue costs	–	(88)
Settlement of convertible debenture (Note 8)	428,878	17,155
Share-based compensation transferred from contributed surplus on exercise of share awards	–	134
Balance, as at March 31, 2019	459,811	279,936

## 11. SHARE-BASED PAYMENTS

### Stock Option Plan

On March 24, 2017, Zargon granted an aggregate of 1.34 million stock options to our directors, officers and certain employees at an exercise price of \$0.72 per share under the Plan. Of these, 0.32 million options were granted to our non-management directors, 0.54 million options were granted to our officers and the balance of 0.48 million stock options were granted to employees. One-third of the options vested on December 31, 2017, one-third vested on December 31, 2018 and the balance will vest on December 31, 2019. Zargon uses a fair value methodology to value the stock options. The assumptions made for the stock options include a volatility factor of 64 percent, a risk free rate of one percent and a forfeiture rate of nil.

On May 30, 2017, the 2017 stock option plan was approved by a majority of the aggregate votes casted by shareholders at the 2017 Annual and Special General Meeting.

The following table summarizes information about the Company's stock options under the Stock Option Plan:

	Three Months Ended March 31, 2019
	Number of Stock Options (thousands)
Outstanding, as at December 31, 2018	1,155
Share awards forfeited	—
Outstanding, as at March 31, 2019	1,155

### Share Award Plan

Under the Share Award Plan, directors, officers, employees and other service providers (the "grantees") are granted the right to receive a defined number of shares in the future, which increases commensurately with each dividend declared by the Company after the grant date. The grantees will receive equity compensation in relation to the value of a specified number of underlying share awards. The awards vest equally over four years and expire five years after grant date. Holders may choose to exercise upon vesting or at any time thereafter, with forfeiture of any shares not exercised by the expiry date. Upon vesting, the grantees are eligible to receive a share award based on the fair value of the underlying share awards plus all notional dividends accrued since the grant date. Zargon uses a fair value methodology to value the share awards.

Due to the nature of the plan, Zargon is required to estimate the forfeiture rate upon initial calculation of fair values. The forfeiture rate is estimated at 13 percent while the interest rate and volatility is set at a historical rate as there is no exercise price. The fair value of the share award is determined on the grant date at the prior day closing price of the Company's common shares on the Toronto Stock Exchange.

The following table summarizes information about the Company's share awards under the Share Award Plan:

	Three Months Ended March 31, 2019
	Number of Share Awards (thousands)
Outstanding, as at December 31, 2018	268
Share awards granted	4
Share awards exercised	(31)
Share awards forfeited	—
Outstanding, as at March 31, 2019	241

### Share-based Compensation

The stock options/share awards for the three months ended March 31, 2019, resulted in share-based compensation of \$0.01 million (2018 - \$0.04 million).

Compensation expense associated with share awards granted is recognized in earnings over the vesting period with a corresponding increase in contributed surplus. The exercise of share awards is recorded as an increase in common shares with a corresponding reduction in contributed surplus.

**Weighted Average Number of Total Shares**

(thousands of shares)	Three Months Ended March 31,	
	2019	2018
Weighted average number of common shares – basic	407,390	30,844
Weighted average number of common shares – diluted	407,390	30,844

Dilution amounts for the three months ended March 31, 2019 of nil million shares (2018 – nil million shares) were added to the weighted average number of shares outstanding during the period in the calculation of diluted per share amounts. These share additions represent the dilutive effect of share rights according to the treasury stock method.

**12. FINANCIAL INSTRUMENTS**

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates cannot be determined with precision as they are subjective in nature and involve uncertainties and matters of judgement.

The following table shows the comparison of the carrying and fair value of the company's financial instruments:

(thousands)	March 31, 2019		December 31, 2018	
	Carrying Value (\$)	Fair Value (\$)	Carrying Value (\$)	Fair Value (\$)
<b>Amortized cost:</b>				
Cash and cash equivalents	3,278	3,278	5,055	5,055
Trade and other receivables	3,096	3,096	866	866
Trade and other payables	5,385	5,385	5,989	5,989
Convertible debentures	–	–	41,421	13,627
<b>Fair value through profit and loss:</b>				
Derivative liabilities	–	–	–	–
<b>Other liabilities:</b>				
Debt (\$Cdn)	4,742	4,872	4,802	4,974

All of the Company's risk management contracts are transacted in active markets. The Company classifies the fair value of these transactions according to the following hierarchy based on the amount of observable inputs used to value the instrument.

## - Level I

Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

## - Level II

Pricing inputs are other than quoted prices in active markets included in Level I. Prices in Level II are either directly or indirectly observable as of the reporting date. Level II valuations are based on inputs, including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the market place.

## - Level III

Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The Company's risk management contracts have been assessed on the fair value hierarchy described above and are classified as Level II. Assessment of the significance of a particular input into the fair value measurement requires judgment and may affect the placement within the fair value hierarchy level. The Company's policy is to recognize transfers into and out of fair value hierarchy levels as of the date of the event or change in circumstances that caused the transfer. The company does not have any financial instruments classified as Level III.

At each reporting date, the Company determines whether transfers have occurred between levels in the hierarchy by reassessing the level of classification for each financial asset and financial liability measured or disclosed at fair value in the consolidated financial statements. Assessment of the significance of a particular input to the fair value measurement requires judgement and may affect the placement within the fair value hierarchy. During the period ended March 31, 2019, there were no transfers between levels I, II or III.

The carrying value of receivables and other liabilities approximate their fair value due to their short maturities, except for the convertible debentures which are determined using Level I inputs.

### **Financial Risk Management**

The Company is exposed to financial risks arising from its financial assets and liabilities. The financial risks include market risk (commodity prices, interest rates and foreign exchange rates), credit risk and liquidity risk.

- **Market Risk**

Market risk is the risk that the fair value of future cash flows of financial assets or liabilities will fluctuate due to movements in market prices and is comprised of the following:

- **Commodity Price Risk**

Commodity price risk is the risk that the fair value of future cash flows will fluctuate as a result in changes in commodity prices. Commodity prices for petroleum and natural gas are impacted by not only the relationship between the Canadian and United States dollar, but also world economic events that dictate the levels of supply and demand. As a means of mitigating exposure to commodity price risk volatility, the Company may enter into various derivative agreements. The use of derivative instruments is governed under formal policies and is subject to limits established by the Board of Directors. The Company's policy is to not use derivative financial instruments for speculative purposes. There are no derivative agreements outstanding as at March 31, 2019.

Natural Gas – To partially mitigate the natural gas commodity price risk, the Company may enter into swaps, which fix the Canadian dollar AECO prices, and natural gas basis hedges.

Crude Oil – The Company may enter into fixed price swaps to partially mitigate its exposure to the WTI NYMEX price.

- **Interest Rate Risk**

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. Borrowings under bank credit facilities are market rate based (variable interest rates); thus, carrying values approximate fair values.

- **Foreign Exchange Risk**

Foreign currency exchange rate risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in foreign exchange rates. The underlying market prices in Canada for petroleum and natural gas are impacted by changes in the exchange rate between the Canadian and United States dollar. As Zargon operates in North America, fluctuations in the exchange rate between the US/Canadian dollar can have a significant effect on the Company's reported results. A \$0.01 change in the US to Canadian dollar exchange rate would have resulted in a \$0.06 million (March 31, 2018 - \$0.05 million) increase or decrease in net earnings for the period ended March 31, 2019. In order to mitigate the Company's exposure to foreign exchange fluctuations, the Company may enter into foreign exchange derivative agreements.

- **Credit Risk**

Credit risk is the risk that the counterparty to a financial asset will default, resulting in the Company incurring a financial loss. This credit exposure is mitigated with credit practices that limit transactions according to counterparties' credit quality. A substantial portion of the Company's accounts receivable are with customers in the oil and natural gas industry and are subject to normal industry credit risks.

The maximum credit risk exposure associated with accounts receivable and derivative assets is the total carrying value. The Company monitors these balances monthly to limit the risk associated with collection. Of Zargon's accounts receivable at March 31, 2019, approximately 90 percent (December 31, 2018 - 77 percent) was owing from two companies and Zargon anticipates full collection.

The Company's allowance for doubtful accounts at March 31, 2019 was nil (December 31, 2018 - nil). During 2019, the Company did not record any additional provision for non-collectible accounts receivable.

As at March 31, 2019, nil million (December 31, 2018 - nil) of accounts receivable are past due, excluding amounts described above, all of which are considered to be collectable.

- Liquidity Risk

Liquidity risk is the risk the Company will encounter difficulties in meeting its financial liability obligations. The Company manages its liquidity risk through funds flow and debt management.

The timing of cash outflows relating to financial liabilities are outlined in the table below:

(\$ thousands)	1 year	2-4 years	Total
Trade and other payables	5,385	–	5,385
Debt (\$Cdn) <sup>(1)</sup>	802	4,070	4,872

*(1) Amount is the full future face value of the \$3.50 million (USD) term debt plus an original issue discount of \$0.15 million (USD) in Canadian dollars.*

### Commodity Price Sensitivities

The following summarizes the sensitivity of the fair value of the Company's risk management positions to fluctuations in commodity prices, with all other variables held constant. When assessing the potential impact of these commodity price changes, the Company believes 10 percent volatility is a reasonable long term measure.

Fluctuations of 10 percent in commodity prices could have resulted in unrealized gains or losses for risk management contracts impacting net earnings of nil for the three months ended March 31, 2019 (March 31, 2018 – \$0.90 million for oil).

### 13. DERIVATIVE CONTRACTS

The Company is a party to certain financial instruments that have fixed the price of a portion of its oil production. The Company enters into these contracts for risk management purposes only in order to protect a portion of its future cash flows from the volatility of oil and natural gas commodity prices and interest rates. For financial risk management contracts, any unrealized gains or losses are recorded in earnings based on the fair value (mark-to-market) of the contracts at each reporting period. The unrealized loss on the statement of earnings/(loss) and comprehensive income/(loss) for the first three months of 2019 was nil and the unrealized loss for the first three months of 2018 was \$0.36 million. The realized loss on the statement of earnings/(loss) and comprehensive income/(loss) for the first three months of 2019 was nil and the realized loss for the first three months of 2018 was \$0.85 million.

There are currently no derivative contracts outstanding.

### 14. COMMITMENTS AND CONTINGENCIES

In the normal course of operations, Zargon executes agreements that provide for indemnification and guarantees to counterparties in transactions such as the sale of assets and operating leases.

These indemnifications and guarantees may require compensation to counterparties for costs and losses incurred as a result of various events, including breaches of representations and warranties, loss of or damages to property, environmental liabilities or as a result of litigation that may be suffered by counterparties.

Certain indemnifications can extend for an unlimited period and generally do not provide for any limit on the maximum potential amount. The nature of substantially all of the indemnifications prevents the Company from making a reasonable estimate of the maximum potential amount that might be required to pay counterparties as the agreements do not specify a maximum amount, and the amounts depend on the outcome of future contingent events, the nature and likelihood of which cannot be determined at this time.

The Company indemnifies its directors and officers against any and all claims or losses reasonably incurred in the performance of their services to the Company to the extent permitted by law. The Company has acquired and maintains liability insurance for its directors and officers. The Company is party to various legal claims associated with the ordinary conduct of business. The Company does not anticipate that these claims will have a material impact on its financial position.

The Company is committed to future minimum payments for natural gas transportation sales commitments, Alkaline Surfactant Polymer purchase commitments and operating leases for office space. Payments required under these commitments are as follows:

(\$ thousands)	March 31, 2019
Less than one year	356
Between one and five years	—
	<b>356</b>
